

Minutes for Meeting 1

December 14, 2011

1 Participants

Ed Keedwell, Martin Boisser, Hugo Hutt

2 Topics

- General discussion of selected problems from the GECCO conferences and their implementation requirements.
- The “Evolving trading rules” and “Ant Wars” problems were discussed in more detail.
- Discussion of potential nature-inspired techniques used to solve the problems, including neural networks, genetic algorithms, and genetic programming.

3 Decisions

It was decided that a problem was to be selected from the list for the next meeting and some of the general design issues relating to it were to be considered.
