Minutes for Meeting 6

January 18, 2012

1   Participants

Martin Boissier, Hugo Hutt

2   Topics

- Discussion of the experiments and the statistics data extracted from the algorithm.

- The performance of the evolved ant was discussed and also how it compares with the performance of the rule-based ants.

- Discussion of the effects caused by modifying the algorithm parameters and how this is shown on the generated graphs.

- The human-competitiveness of the algorithm and how this could be improved was discussed.

3   Decisions

Decided on the experiments and graphs to be included in the report and also discussed the project as a whole, such as how the final implementation compares with the initial predictions.
